		<p>I like MAP CP12</p> <ol style="list-style-type: none"> 1. Good decision putting Flathead County, Glacier County & Glacier Park in the West with communities of like interest. 2. Happy to see the Salish Kootenai now joined by the Blackfoot Indian Reservation giving them a much stronger voice. 3. Pondera, the one small County that is split, nice to know the Commissioners have said they are okay with it. 4. The Districts are equal in population, compact, contiguous and comply with the Voting Rights Act. 5. The Districting Commission has made their decision based on the Laws, HB506 and the MCA 5-1-115. 6. It's refreshing to see government following the Laws. <p>Please continue to support Map CP12. Thank you for your hard work.</p>

CP12	Like	Map 12 is the most fair districting option! It's the right thing to do! Thanks	Beverly Williams	williamsinteriors@comcast.net	Whitefish	MT
CP12	Like	As an independent voter I have followed the congressional districting closely. This map is the only one that offers competitive districts, aligns voter concerns and does not offer a political bias. All the other proposed maps are gerrymander to such a degree as to prevent actual representation. This is the only viable and fair districting map. CP12	Like	I feel that CP12 is a compromise which is the best that can be hoped for. It follow the state contours and attempts to keep population and counties together. Thank you Commissioners for your work. Let the campaigning begin!	Ann Ingram	anningram58@yahoo.com	Kalispell, Montana	MT
CP12	Like	I think CP-12 is a good compromise. Some wanted both universities in the west, all the unions together, Bozeman in the west, Helena in the west in a whole Lewis and Clark count while splitting the Flathead and isolating Kalispell, Bigfork and Columbia Falls by mountains, highways, weather and economy (CP11). Did I miss anything. I commend the commission for their hard work trying to find a map that makes no one happy but follows the statues.	David L Ingram, MD	dli1957@yahoo.com	Kalispell, Montana	MT
